AI and In-Network

- Defining an Interface for multiple AI agents
    - A2A : Agent to Agent Protocol
    - MCP : Model Context Protocol

- Being towards de-facto standards
    - A2A Protocol landed in Open Source Project
    - MCP is being widely deployed in AI industries without home

- AI agents belong to AF or NF?
    - Which new data models and interfaces are required for AI services

- If out of scope, how to deal with AI services in I2ICF?
